

## INDEX TO VOL. X.

	PAGE
Address of the President.....	8
AYLESWORTH, DR. GEO. M., Paper CXXIV., <i>Test of a Hot Air Heating Apparatus Using Radiators Instead of Registers</i> .....	101
BARRON, H. J., Papers CXXI., CXXX., <i>A Review of Some Heating Literature</i> , 48, 216; Disc. on The Metric System, 85; on Hot-air Heating Apparatus, 112; on Ventilation.....	188
Battery System of Warm Air Heating, Paper CXXVII., by C. E. OLDACRE .....	137
BLACKMORE, J. J., Disc. on The Metric System, 88; on Ventilating Residences .....	191
CARPENTER, R. C., Paper CXXVI., <i>The Necessity of Moisture in Heated Houses</i> , 129; Disc. on Heating Greenhouses.....	182
CARY, A. A., Disc. on Ventilating Apartment Houses.....	183
CHEW, F. K., Disc. of Hot Air Heating Apparatus, 112; on Heat Transmission, 124; on Ventilating Houses.....	249
Combination Hot Air and Hot Water Heating.....	172
Education of Heating and Ventilating Engineers, Paper CXXXI., J. D. HOFFMAN.....	222
Extended Heating Surface in Furnaces.....	125
Flues for Warm Air, Proportioning.....	176
Formulæ for Furnace Heating.....	251
Furnace Heating (see also Heating by Warm Air).....	235
Furnaces, Hot Air.....	246
Gravity System of Ventilating.....	282
Greenhouse Heating.....	177
HARVEY, A. J., Disc. on Heating Greenhouses.....	179
HAUSS, CHARLES F., Paper CXXIII., <i>The Metric System</i> , 80; Paper CXXV., <i>To Figure Heating Work Accurately. Losses in British Thermal Units for Various Surfaces</i> .....	114
Heat Transmission, Coefficients of.....	114
Heating Literature, Review of Papers CXXI., CXXX., by H. J. BARRON .....	48, 216
Heating Surface, Extended, Disc. on.....	126
Heating, Warm-air, Advanced Methods of, Paper CXXXII., by A. O. JONES.....	235
History of the Society, Paper CXX., by S. A. JELLETT.....	35
HOFFMAN, GEO. D., Disc. on Furnace Heating.....	246
HOFFMAN, JAS. D., Paper CXXXI., <i>The Education of Heating and Ventilating Engineers</i> .....	235
Hot Air Heating Apparatus Using Radiators Instead of Registers, Paper CXXIV., by GEO. M. AYLESWORTH.....	101

	PAGE
Hot Water Heating in the Schioldann Institution, Copenhagen, Denmark, Paper CXII., by CAPT. A. B. RECK.....	55
HOYT, A. T., Vacuum System of Heating by Water.....	257
Humidity, see also Moisture.....	153, 264
JELLETT, S. A., Paper CXX., <i>A Short History of our Society</i> .....	35
JONES, O. A. Paper CXXXII., <i>Advanced Methods of Warm Air Heating</i> .....	235
KENT, WILLIAM, Disc. on The Metric System, 93; on Coefficients of Heat Transmission, 119; Experiment with Schlicht System, 158; on Water Pans in Furnaces.....	161
KINEALY, J. H., Disc. on The Metric System, 86; on Transmission of Heat.....	120
Legislation, Report of Committee on.....	22
MACKAY, W. M., Secretary, Silver Cup Presented to, 31; Disc. on Heating Greenhouses.....	180
Metric System, Paper CXXIII., by CHAS. F. HAUSS.....	80
Metric System, Vote of Society on.....	13
Moisture, Necessity of, in Heated Houses, Paper, by R. C. CARPENTER.....	129
OLDACRE, C. E., Paper CXXVII., <i>The Battery System of Warm Air Heating</i> .....	138
Péclet's Coefficients of Heat Transmission.....	119
Pipe Joints.....	198
Plenum System, Alleged Failure of.....	274
Proceedings of the Annual Meeting.....	7
Proceedings of the Semi-annual Meeting.....	109
RECK, CAPT. A. B., Paper CXII., <i>Description of Hot Water Heating Apparatus in Copenhagen, Denmark</i> , 55; Disc. on The Metric System, 92; on Ventilating Residences.....	190
RICHARDSON, D. S., Disc. on Water Pans in Furnaces.....	155
Report of the Board of Governors.....	13
Report of the Committee on Compulsory Legislation.....	22
Report of the Committee on Tests.....	26
Report of the Committee on Uniform Contracts.....	15
Report of the Secretary.....	10
Report of the Tellers of Election.....	19
Report of the Tenth Anniversary Committee.....	16
Report of the Treasurer.....	12
School Houses, Ventilation of.....	188, 283
SNOW, W. G., Disc. on Hot Air Heating Apparatus, 109; on Heat Transmission in Furnaces.....	121
SWITZER, W. H., Disc. on Battery System of Warm Air Heating, 152; on Water Pans in Heaters.....	153
TOPICAL DISCUSSIONS, ANNUAL MEETING:	
No. 1. Should it be considered the work of the Society to secure records of different types of heating systems?.....	162
No. 2. Could the interests of the purchasers of heating systems be conserved by a closer relation between the heating engineer and manufacturer of specialties?.....	169
No. 3. Can a constant relation be established between the areas of cold air ducts, hot air flues and the radiating and heating surfaces in indirect heating?.....	170

	PAGE
No. 4. What is the prevailing practice in proportioning water heaters in hot air furnaces to the work to be done?.....	172
No. 5. Are all types of sectional cast iron boilers adapted for steam heating?.....	175
No. 6. Has experience demonstrated the relative superiority of iron or steel pipe as regards durability in heating systems?.....	176
No. 7. Has latest practice demonstrated the advisability of using smaller sizes of pipe in hot water systems in greenhouses?.....	177
No. 8. Has the need been demonstrated of some method of ventilation in connection with accepted systems of heating?.....	183
No. 9. In making screwed joints, is it better to use some compound or make them up iron to iron with no compound?.....	198
TOPICAL DISCUSSION, SEMI-ANNUAL MEETING:	
No. 1. Are the commercial demands upon the time of our members the only hindrance to the presentation of tabulated or descriptive experience of their work?.....	255
No. 2. Vacuum systems of steam heating.....	255
No. 3. Can the effect of humidity upon the sensible temperature of a room be modified by ordinary heating and ventilating apparatus.....	264
No. 4. Does the practice of consulting engineers in heating and ventilating admit of uniformity in prices for services?.....	270
No. 5. Has the recent discussion of the plenum system of heating in England added any new and useful information on this branch?.....	274
No. 6. Do the increased benefits of fan over gravity systems offset the operative necessities?.....	282
No. 7. Is there any system of heating and ventilating school-rooms by fans which will not be thrown out of balance by opening windows?.....	285
No. 8. Is it possible to positively change the air in a building a given number of times per hour?.....	285
No. 9. Is it good practice to design a heating system by direct radiation for heating when the outside temperature is, say, 30 degrees F., and supply additional heat by a fan when the temperature is below that point?.....	286
Transmission of Heat in Buildings. Paper by C. F. HAUSS.....	114
Transmission of Heat in Buildings. Table by A. R. WOLFF.....	128
Transmission of Heat in Furnaces.....	120
Vacuum Steam Heating Systems.....	255
Vacuum Water Heating, by A. T. HOYR.....	257
Ventilation of Houses.....	183
Ventilation, Upward or Downward.....	274
Water Pans in Heaters.....	129, 153
WOLFE, W. F., Disc. on Hot Air Heating Apparatus.....	107
WOLFF, ALFRED R., Diagram of Transmission of Heat in Buildings...	128
